CREATING SUPPLY CHAIN EXCELLENCE

42ND EDITION
GLOBAL SUPPLY CHAIN MANAGEMENT
LAUSANNE 2015
EXECUTIVE MASTER PROGRAM MAS
CONTINUING EDUCATION CAS
http://iml.epfl.ch

22 YEARS
TEACHING SESSIONS
LAUSANNE 1993-2015
Executive Master in Global Supply Chain Management

Organized in collaboration with the EPFL, the ENPC (Ecole des Ponts ParisTech) and the AFT-IFTIM group the program consists of 6 month theoretical part (academic program) followed by a practical project of 6 month (internship) which is to be carried out in a company.

General calendar
- Theoretical part January – July
- Practical project July - December

Theoretical part
The academic program consists of 5 blocks with forty-hour courses each, designed to expand the practical and methodological knowledge of the participants.

Each block has 4 modules that cover the latest developments in theory, tools and best practices in supply chain management. Every module has a formal evaluation and a qualifying exam synthesizes the material for all of the courses in the module.

In addition to the 20 weeks (5 blocks), 2 weeks business games oriented are organized (W1, W2). These business games are Web-based simulations in which players within a team use the Internet to collaborate, to reach decisions, to implement these decisions and to examine the results obtained. Some of the games are designed to develop a better understanding of fundamental supply chain concepts such as the Bullwhip effect and Risk pooling, but others are competitive games involving multi-enterprise strategic and tactical business decisions.

The teaching is ensured by both academics and business experts and is developed based on the methodology provided by the professors from universities involved in the program.

Practical part
Once the theoretical part is successfully accomplished, students must realize a practical project within a company (internship).

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and it is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project could be operational or strategically oriented.

Academic staff supervises the practical project. It is completed within a company or in one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.
EPFL - IML internship: general conditions

Internship period: From July to December

Length of the internship: Minimum 20 weeks

Student status: "Etudiant-stagiaire", working permission for the foreign students; an alternative is also employee of the company

Proposal of subject: Will reflect company’s needs; Could be defined by the company and discussed directly with the chosen student; as an alternative, it could also be defined with the help of IML staff

Type of subject: Strategic / operational projects relevant for the company, and relate to the supply chain management

Coordination: Supervision from the company as well as IML team; intermediate reports and meetings according to an initial planning elaborated by the student should be organized by the student

Place of work: Ideally in the company; during the internship students may benefit from EPFL / IML infrastructure

Presentation of the work: End of November, in front of a jury composed by IML coordinating staff and the company representative(s)

Confidentiality: If requested by the company confidentiality is strictly respected

Proposition procedure: IML acts as an intermediary between companies and the students; meanwhile the students are searching for internships on their own;

Approaches for internship proposals:

1. The company formalizes the project and provides us with a written proposal explaining project mission, profile requirements, deadlines, contact information; the offer will be announced to the students, the students postulate and organize interviews with the company representative

2. The company consults the CV book, chooses the candidates whose profile suit the best to their requirements and contacts them directly; In parallel the company will inform us about this approach

3. The company will contact IML in order to define the project and contract (company, student, EPFL-IML)

For further information or for sending internship proposals please kindly contact:

>> Professional objective

After a long experience managing International Customer Service and Sales Administration departments, I would like to have the opportunity to find a job within an integrated Supply Chain department and be able to go through the different levels (Execution, Monitoring, Design) to put in practice what I have learned in this Master.

What I am most interested in and what motivates me more is to have the chance to interact and have a strong relationship with the different key actors in the company (Production, Logistics, Purchasing, Sales, Finance, Marketing (NPDI)) as this close collaboration at the end of the day helps Supply Chain team to better understand where it can produce more value to the customer.

>> Education

1993-1995 Ramon Llull University, Barcelona & Manhattan College, New York - Master in Business Administration (MBA)
1986-1990 University of Barcelona - Translator and Interpreter University (E.U.T.I) French and English

>> Professional experience

2009-2013 Zobele Group S.P.A, Barcelona - ZRS Customer Service & Sales Administration Manager
2002-2008 Stanford Hospital, USA - Housing office officer / Tokyo American Club, Japan. WG Fundraising Director / Hamburg Int. School, Germany. PTA Treasurer
1991-1992 RTO’92 (Olympic Games), Barcelona - IBC Director Administrative Assistant

Professional objective

My passion for the international trade brought me to attend this Master. This interest started when I began working in the BNP Paribas group. Working in this company, I was in charged to review international contracts such as Escrow and Trust Agreements. It was in this occasion that I understood my passion went beyond legal issues and was much more related with the entire business of a company. In more details I can say that my real interest was to understand the entire cycle of a product from the time it is produced until it is sold to the customer. It is for this reason that I would like finding an opportunity in the supply chain field. Passion, determination and being lover of challenges complete my profile.

Professional objective
After having graduated of a Master degree in Material’s Engineering and Management and a cumulated working experience of 6 years in Quality/Continuous Improvement, Sales Engineering, and Planning/Scheduling functions where I discovered Supply Chain played an increasingly important role in corporate strategy and competition, I decided to consolidate my knowledge in this field by attending the “Global Supply Chain Management” program organized in collaboration by EPFL, ENPC and the AFT-IFTIM group.

Ambitious, trustworthy, perseverant, reactive and results driven, I am looking for a challenging position that will enable me to increase my skills in Supply Chain in a multicultural and dynamic environment and let me participate to meet corporate strategy and customer expectations.

Education

2015  IML – EPFL, Lausanne, CH – Executive Master in Global Supply Chain Management

2007-2010  ESIEE PARIS, Paris, FR – Master’s degree in Material’s Engineering and Management with 17 months as an apprentice in AREVA T&D. And Erasmus semester at Politecnico di Milano (Como, IT)

Professional experience

03/2014-12/2014  JEAN-GALAY SA, Geneva, CH – Sales Engineer & Planner/Scheduler (50/50%)

03/2011-03/2014  JEAN-GALAY SA, Geneva, CH – Sales Engineer

04/2009-08/2010  AREVA T&D, Aix-les-Bains, FR – Continual Improvement Engineer Apprenticeship

06/2008-09/2008  SNR-NTN, Argonay, FR – Process Improvement Engineer Internship

Year of professional experience: 6

Languages

French(Mother tongue), English(Fluent), Spanish (Intermediate)
**Professional objective**

My professional background in Transportation/Logistics and Import & Export combine with all the Supply Chain knowledge gained in the Master Program, helped me to become a serious and effective worker. Experienced in working under pressure, within strict deadlines and regulations, demonstrating a “hands-on” approach to work and the drive to achieve goals and improve processes. Geographically mobile, acknowledged as hard worker and very committed person, I am convinced of my added value to my future employer. I am looking for a challenging Supply Chain management position, my main areas of interests are: logistics, procurement and planning but I am open to any other exciting opportunity.

**Education**

- 2015 (in Progress) Executive Master in Global Supply Chain Management at the Swiss Federal Institute of Technology, Lausanne, EPFL
- 2004-2007 Bachelor degree in Maritime and Transport Economics, at University of Genoa (Italy)

**Professional experience**

- 04/2011-12/2014 Mediterranean Shipping Company, Houston TX, U.S.A
  Intermodal/Logistics Coordinator
- 06/2008-12/2010 Cosco Container Lines, Genoa, Italy. Accountant

>> Professional objective

My professional objectives are to put in practice the knowledge I acquired during the Executive Master in Global Supply Chain Management at IML. I already have some relevant experience in supply chain, since I worked as demand planner for almost two years, however I am more than open to expand my competences in other fields in supply chain. Previously I graduated at HEC – Lausanne where I acquired management skills.

>> Professional objective

Master graduate from a top tier European university, I am reliable, resilient and conscientious. I can work under direct and indirect supervision. My engineering background forged my analytic and adaptation skills. Team player, problem solver and communicative, I strive to be part of a dynamic, multicultural and innovative company.

I aim to orient my career in Supply chain management. I have a high interest to contribute in planning, logistics and procurements areas. I am persuaded that my motivation and competences illustrate my possible contribution to my future employer.

>> Education

2012-2014  
Ecole Polytechnique Fédérale de Lausanne - Master of Science MSc en Microtechnique specialized in Production Technics

2008-2011  
Ecole Polytechnique Fédérale de Lausanne - Bachelor in MicroEngineering

>> Professional experience
