CREATING SUPPLY CHAIN EXCELLENCE

48TH EDITION
GLOBAL SUPPLY CHAIN MANAGEMENT
LAUSANNE 2018

CV BOOK
http://iml.epfl.ch

25 YEARS
TEACHING SESSIONS
LAUSANNE 1993-2018
Executive Master in Global Supply Chain Management

Organized in collaboration with the EPFL, the ENPC (Ecole des Ponts ParisTech) and the AFT-IFTIM group the program consists of 6 month theoretical part (academic program) followed by a practical project of 6 month (internship) which is to be carried out in a company.

General calendar
- Theoretical part January – July
- Practical project July - December

Theoretical part
The academic program consists of 5 blocks with forty-hour courses each, designed to expand the practical and methodological knowledge of the participants.

Each block has 4 modules that cover the latest developments in theory, tools and best practices in supply chain management. Every module has a formal evaluation and a qualifying exam synthesizes the material for all of the courses in the module.

In addition to the 20 weeks (5 blocks), 2 weeks business games oriented are organized (W1, W2). These business games are Web-based simulations in which players within a team use the Internet to collaborate, to reach decisions, to implement these decisions and to examine the results obtained. Some of the games are designed to develop a better understanding of fundamental supply chain concepts such as the Bullwhip effect and Risk pooling, but others are competitive games involving multi-enterprise strategic and tactical business decisions.

The teaching is ensured by both academics and business experts and is developed based on the methodology provided by the professors from universities involved in the program.

Practical part
Once the theoretical part is successfully accomplished, students must realize a practical project within a company (internship).

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and it is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project could be operational or strategically oriented.

Academic staff supervises the practical project. It is completed within a company or in one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.
EPFL - IML internship: general conditions

Internship period: From July to December
Length of the internship: Minimum 20 weeks
Student status: “Etudiant-stagiaire”, working permission for the foreign students; an alternative is also employee of the company
Proposal of subject: Will reflect company’s needs; Could be defined by the company and discussed directly with the chosen student; as an alternative, it could also be defined with the help of IML staff
Type of subject: Strategic / operational projects relevant for the company, and relate to the supply chain management
Coordination: Supervision from the company as well as IML team; intermediate reports and meetings according to an initial planning elaborated by the student should be organized by the student
Place of work: Ideally in the company; during the internship students may benefit from EPFL / IML infrastructure
Presentation of the work: End of November, in front of a jury composed by IML coordinating staff and the company representative(s)
Confidentiality: If requested by the company confidentiality is strictly respected
Proposition procedure: IML acts as an intermediary between companies and the students; meanwhile the students are searching for internships on their own;
Approaches for internship proposals:
1. The company formalizes the project and provides us with a written proposal explaining project mission, profile requirements, deadlines, contact information; the offer will be announced to the students, the students postulate and organize interviews with the company representative
2. The company consults the CV book, chooses the candidates whose profile suit the best to their requirements and contacts them directly; In parallel the company will inform us about this approach
3. The company will contact IML in order to define the project and contract (company, student, EPFL-IML)

For further information or for sending internship proposals please kindly contact:

PROFESSIONAL OBJECTIVE

I would like to build a long term career within an integrated Supply Chain department, with growth opportunities, in a dynamic and fast growing organization that values highly motivated and result driven individuals. I would like to go through different levels (Execution, Monitoring, Design ...) to put into practice what I have been learning within the executive master in global supply chain management, combined with my engineering vision, to face today's business and technology challenges by developing deep expertise, coupled with a broad understanding of the fundamentals of the industry.

What I am most interested in and what motivates me more is to have the chance to interact ,and maintain a strong relationship, with the different key actors in the company (Production, Logistics, Purchasing, Sales, Finance, Marketing )as this close collaboration, at the end of the day, helps Supply Chain team, to better understand where it can produce more value to the customer, for continuous improvements.

2008-2010  
DicomExpress, Montreal, Canada. I.T Technician

YEARS OF PROFESSIONAL EXPERIENCE : 9

LANGUAGES

Arabic (mother tongue), French (Fluent), English (Fluent), German (Intermediate)
PROFESSIONAL OBJECTIVE

Having occupied different functions throughout companies I have acquired a global and transversal vision of business. In order to build upon this approach, my natural curiosity has pushed me towards Global Supply Chain Management, in which I am particularly interested, since it requires cross-functional competencies and customer oriented skills. I strongly believe that improvements and solutions can be found by being “in the field” with people, understanding their environment and cooperating together towards a common company objective.

EDUCATION

2018 - 2018 Executive Master in Global Supply Management
Ecole Polytechnique Fédérale Lausanne (EPFL - IML), Lausanne

2000 - 2004 Bachelor of Applied Science (BSc) in Communication – Engineering – Management

**PROFESSIONAL OBJECTIVE**

During the past 5 years, I have improved my ability to find quick solutions, cut a budget and manage a planning. The next step is now to deal with a full process/flow in order to improve it. A deep understanding of a process and its optimization meet all my interests. In short working in supply chain leads to the perfect opportunity to value my experience while refining my skills.

PROFESSIONAL OBJECTIVE

I chose to join this Master at IML to enlarge my professional knowledge in terms of economics, planning and implementation of supply chain. The strong international character, the teaching method and practical projects, the experiences offered by IML are the main reasons which led me to choose this program.

The new knowledge obtained thanks to IML, together with my previous experience in a multinational telecommunication company where I was appreciated for my hardworking attitude and the attention to every project detail will make me a valuable asset for any business.

My experience and knowledge about language, culture and business related to a super-economic power like China, would be a competitive advantage for the business I am going to be involved with.

EDUCATION

2018 Executive Master in Global Supply Chain Management, IML, Losanne, Switzerland
2013-2014 Master in Interpreting and Translation (Chinese Mandarin- English) University of Nottingham, Ningbo, China
2007-2013 Bachelor Degree in Asian Languages and Culture, La Sapienza University, Rome, Italy

PROFESSIONAL EXPERIENCE

2016-2017 Okin BPS for Verizon Enterprise Solutions
Project Manager

2015 Delegation of the European Union to China
Intern Press and Information section
