Executive Master in Global Supply Chain Management

Organized in collaboration with the EPFL, the ENPC (Ecole des Ponts ParisTech) and the AFT-IFTIM group the program consists of 6 month theoretical part (academic program) followed by a practical project of 6 month (internship) which is to be carried out in a company.

General calendar
- Theoretical part January - July
- Practical project July - December

Theoretical part
The academic program consists of 5 blocks with forty-hour courses each, designed to expand the practical and methodological knowledge of the participants.

Each block has 4 modules that cover the latest developments in theory, tools and best practices in supply chain management. Every module has a formal evaluation and a qualifying exam synthesizes the material for all of the courses in the module.

In addition to the 20 weeks (5 blocks), 2 weeks business games oriented are organized (W1, W2). These business games are Web-based simulations in which players within a team use the Internet to collaborate, to reach decisions, to implement these decisions and to examine the results obtained. Some of the games are designed to develop a better understanding of fundamental supply chain concepts such as the Bullwhip effect and Risk pooling, but others are competitive games involving multi-enterprise strategic and tactical business decisions.

The teaching is ensured by both academics and business experts and is developed based on the methodology provided by the professors from universities involved in the program.

Practical part
Once the theoretical part is successfully accomplished, students must realize a practical project within a company (internship).

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and it is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project could be operational or strategically oriented.

Academic staff supervises the practical project. It is completed within a company or in one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.
EPFL - IML internship: general conditions

Internship period: From July to December
Length of the internship: Minimum 20 weeks
Student status: “Etudiant-stagiaire”, working permission for the foreign students; an alternative is also employee of the company
Proposal of subject: Will reflect company’s needs; Could be defined by the company and discussed directly with the chosen student; as an alternative, it could also be defined with the help of IML staff
Type of subject: Strategic / operational projects relevant for the company, and relate to the supply chain management
Coordination: Supervision from the company as well as IML team; intermediate reports and meetings according to an initial planning elaborated by the student should be organized by the student
Place of work: Ideally in the company; during the internship students may benefit from EPFL / IML infrastructure
Presentation of the work: End of November, in front of a jury composed by IML coordinating staff and the company representative(s)
Confidentiality: If requested by the company confidentiality is strictly respected
Proposition procedure: IML acts as an intermediary between companies and the students; meanwhile the students are searching for internships on their own;
Appropes for internship proposals:
1. The company formalizes the project and provides us with a written proposal explaining project mission, profile requirements, deadlines, contact information; the offer will be announced to the students, the students postulate and organize interviews with the company representative
2. The company consults the CV book, chooses the candidates whose profile suit the best to their requirements and contacts them directly; In parallel the company will inform us about this approach
3. The company will contact IML in order to define the project and contract (company, student, EPFL-IML)

For further information or for sending internship proposals please kindly contact:

>> Professional objective

I worked more than two years as production manager in an export coffee company based in Colombia and one year as project manager in the development of new small Agro-industrial companies. As a physic engineer I have carried out research projects in Colombia and I also have done some courses in Switzerland in order to create a technologic start-up. As a Supply Chain Manager I am looking for a challenging position within a dynamic and international organization where my knowledge, experience and skills can contribute towards the growth and success of the organization. My main areas of interest are in sustainable and international companies focused on trading or shipping and I would always be exploring high-tech solutions. I am obviously open to any opportunity in other areas of supply chain.

>> Professional objective

I am looking for a company where I can work on its Supply Chain, using the knowledge I have acquired during my master in Global Supply Chain Management. Working for Walt Disney Co. oriented me towards customer service using my people and communication skills. While working on risk management and exports portfolio added proactiveness, problem solving and knowledge of the export process to my professional performance. Based on my experience and knowledge I look forward to enhance the strategic management of the Supply Chain of companies, creating a sustainable business that succeeds on an international level.

>> Education

On-going Master on Global Supply Chain Management, at International Institute for the Management of Logistics (IML - EPFL)
2006-2011 B.A. International Business, minor on Supply Chain Management, at ITESM Campus Monterrey, Mexico
2011 APICS CSCP (Certified Supply Chain Professional) course

>> Professional experience

2011-2012 DEACERO. Manager of Exports Portfolio/Exports Risk Management
2009-2011 DEACERO. Intern Exports Risk Management
05.01–08.11.2007 WALT DISNEY CORP. Guest Services (Disney’s College Program)

>> Professional objective

Based on my current educational and professional background, I am looking for an internship that would provide me the necessary tools to improve my theory and practical expertise on the supply chain field. After three years of relevant experience in production planning, I would certainly aim at building my professional profile by developing myself in both supply and demand side, so as to achieve a full understanding of a company’s value stream global network. In order to succeed in achieving the business objectives of most manufacturing or service companies, tasks prioritization, decision-making mindset under pressure environments and effective communication flow across high-performance teams are compulsory; characteristics that I found relevant for the position in the internship.

>> Education

07.2011-05.2012 APICS – Certified in Production and Inventory Management
08.2005-07.2009 Universidad Iberoamericana, Mexico City - Bachelor of Industrial Engineering

>> Professional objective
After an MSc in International Business Management and several years’ experience within
customer service measurement and performance evaluation, I have taken the decision to
specialise in Supply Chain Management. During my career, I have been working as the central
link between different entities of the company, suppliers and clients in order to deliver high
performing, effective projects as well as working very closely with data, providing analysis and
recommendations. This experience, as well as my education, have shown me the importance of
Supply Chain within a business and have helped generate my interest and desire to work in the
field. Studying at the IML is giving me the great opportunity to build on my current education and
experience, and provide me with the specific skills and essential knowledge to develop further. I
hope to carry out my internship within a recognised international organisation, where I can apply
my past experience, as well as the knowledge and skills acquired during the program on a
practical level, to eventually provide me with a springboard for a successful career in Supply
Chain

After nine years of international experience in Africa, Asia and Europe, I decided to further specialize in value creation through innovative global supply chain management. Therefore my objective is to put my educational background as agricultural engineer, my international experience and the knowledge obtained through the IML Master to the service of a global company and to further develop my skills and knowhow in supply chain management. I would like to join a dynamic and result oriented team, with a holistic approach to supply chain management, and to actively contribute as project manager to the assessment, design and implementation of innovative supply chain solutions and strategies at international level.

>> Professional objective

My main goal as a professional in supply chain management is to deliver an extreme high valued job to the customers through optimizing the integration between the logistical processes. Therefore, I would like to be able to integrate my professional background - customs clearance and transportation of imported/exported goods - with the new knowledge acquired during the Executive Master of Global Supply Chain Management, in order to work in a logistics team in which different, but complementary, activities related to the supply chain are performed

>> Education

2010-2011 IBMEC, Rio de Janeiro, Brazil - Postgraduate (CBA) in Logistics
2006-2010 Universidade Estacio de Sa, Rio de Janeiro, Brazil - Bachelor in International Relations
2013 Executive Master of Global Supply Chain Management, EPFL, Lausanne, Switzerland (ongoing)

>> Professional experience

07.2010-09.2011 Costa Porto International Logistics, Logistics and Customs Clearance Commercial Assistant
07.2009-04.2010 Duty Free Dufry Brazil, Logistics Internship
04.2009-07.2009 Aliança Shipyard, Import & Export Internship
06.2008-04.2009 STX OSV Brazil, Import, Export and Logistics Internship

Year of professional experience : 3
