CREATING SUPPLY CHAIN EXCELLENCE

GLOBAL SUPPLY CHAIN MANAGEMENT

CV BOOK LAUSANNE 2012

http://iml.epfl.ch
Executive Master in Global Supply Chain Management

Organized in collaboration with the EPFL, the ENPC and the AFT-IFTIM group the program consists of 6 month theoretical part (academic program) followed by a practical project of 6 month (internship) which is to be carried out in a company.

General calendar

> Theoretical part January - July
> Practical project July - December

Theoretical part

The academic program consists of 5 blocks with forty-hour courses each, designed to expand the practical and methodological knowledge of the participants.

Each block has 4 modules that cover the latest developments in theory, tools and best practices in supply chain management. Every module has a formal evaluation and a qualifying exam synthesizes the material for all of the courses in the module. At the end of each block are foreseen international team business games aiming to integrate the concepts covered in the class. These business games are Web-based simulations in which players within a team use the Internet to collaborate, to reach decisions, to implement these decisions and to examine the results obtained. Some of the games are designed to develop a better understanding of fundamental supply chain concepts such as the Bullwhip effect and Risk pooling, but others are competitive games involving multi-enterprise strategic and tactical business decisions.

The teaching is ensured by both academics and business experts and is developed based on the methodology provided by the professors from universities involved in the program.

Practical part

Once the theoretical part is successfully accomplished, students must realize a practical project within a company (internship).

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and it is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project could be operational or strategically oriented.

Academic staff supervises the practical project. It is completed within a company or in one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.
**IML internship: general conditions**

<table>
<thead>
<tr>
<th><strong>Internship period:</strong></th>
<th>From July to December 2012</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Length of the internship:</strong></td>
<td>Minimum 20 weeks</td>
</tr>
<tr>
<td><strong>Student status:</strong></td>
<td>“Etudiant-stagiaire”, working permission for the foreign students; an alternative is also employee of the company</td>
</tr>
<tr>
<td><strong>Proposal of subject:</strong></td>
<td>Will reflect company’s needs; Could be defined by the company and discussed directly with the chosen student; as an alternative, it could also be defined with the help of IML staff</td>
</tr>
<tr>
<td><strong>Type of subject:</strong></td>
<td>Strategic / operational projects relevant for the company, and relate to the supply chain management</td>
</tr>
<tr>
<td><strong>Coordination:</strong></td>
<td>Supervision from the company as well as IML team; intermediate reports and meetings according to an initial planning elaborated by the student should be organized by the student</td>
</tr>
<tr>
<td><strong>Place of work:</strong></td>
<td>Ideally in the company; During the internship students may benefit from EPFL / IML infrastructure</td>
</tr>
<tr>
<td><strong>Presentation of the work:</strong></td>
<td>End of November 2012, in front of a jury composed by IML coordinating staff and the company representative(s)</td>
</tr>
<tr>
<td><strong>Confidentiality:</strong></td>
<td>If requested by the company confidentiality is strictly respected</td>
</tr>
<tr>
<td><strong>Proposition procedure:</strong></td>
<td>IML acts as an intermediary between companies and the students; meanwhile the students are searching for internships on their own;</td>
</tr>
<tr>
<td>Approaches for internship proposals:</td>
<td></td>
</tr>
<tr>
<td>1. The company formalizes the project and provides us with a written proposal explaining project mission, profile requirements, deadlines, contact information; the offer will be announced to the students, the students postulate and organize interviews with the company representative</td>
<td></td>
</tr>
<tr>
<td>2. The company consults the CV book, chooses the candidates whose profile suit the best to their requirements and contacts them directly; In parallel the company will inform us about this approach</td>
<td></td>
</tr>
<tr>
<td>3. The company will contact IML in order to define the project</td>
<td></td>
</tr>

PROFESSIONAL OBJECTIVE
Recently graduated in master of mechanical engineering at EPFL oriented to production management and processes, mechatronic and automatic systems. I accomplished my master thesis within Logistic department of Givaudan Vernier. During this internship I participated to the organization of the new logistic concept of the site, improving flux in some workshops and proposing KPIs. Mainly interested in manufacturing, optimization, supply chain management, operations, logistics, continuous improvements and purchasing, I would like to work on projects within a dynamic environment.

EDUCATION
2009-2011 Master of Science MSc in mechanical engineering  
2009-2011 Minor In management of technology and entrepreneurship  
2005-2009 Bachelor in mechanical engineering.

PROFESSIONAL OBJECTIVE

I am graduated in Business Management and have experience as a Supply Chain Analyst in the telecommunication industry. My main responsibilities were the elaboration of a KPIs system, stock reconciliation with third party logistics IT system, group reporting and the implementation of a replenishment algorithm for point of sales. I am very keen to use both my knowledge and my personal skills to succeed in a challenging position within a dynamic company promoting its multicultural environment and where a high customer service level is considered as a key success factor. My main areas of interest are demand & supply planning, transport management, purchasing and project management.

EDUCATION

2012 On-going Executive Master in Global Supply Chain Management, Ecole Polytechnique Fédérale de Lausanne
2009-2010 Erasmus Program, Cardiff Business School (UK)
2006-2010 BSc in Management, Faculty of Business and Economics (HEC) of the University of Lausanne

PROFESSIONAL OBJECTIVE

I am a mathematical engineer graduated on 2008 at EPFL. I worked in two international organizations as a statistician in 2009: ITC and WTO. Then, an opportunity for doing a PhD in quantitative methods at HEC Montréal arose. After one (successful) year there, I decided to stop because I realized I want to be on the field working on concrete issues. I am now fulltime student of the GSCM master program at IML. I am looking for a challenging logistics or supply chain management position within a dynamic and exciting organization where my knowledge, experience and skills will contribute towards the growth and success of the organization. My main areas of interest are logistics, planning, demand forecasting, risk management. I am obviously open to any opportunity in other areas of supply chain.

EDUCATION

2010-2011 PHD in Administration - HEC Montréal
2006-2008 MSc in Mathematical Engineering - EPFL
2002-2006 Bachelor in Mathematics - EPFL

PROFESSIONAL EXPERIENCE

2009 World Trade Organization (Geneva) - Statistical assistant
2009 International Trade Center (Geneva) - Statistician (intern)

PROFESSIONAL OBJECTIVE
After working 5 years for a transport and logistic company at different levels and locations, it was the time for me to develop and broaden my knowledge from transport industry to the global supply chain management. My main goal is to work as a Supply Chain specialist to develop and implement solutions in an international environment.
I want to develop new skills in any area of Supply Chain; my highest interests are in fields such as Forecasting and Demand Planning, Purchasing and Sourcing or Business Model and Strategy.

EDUCATION
2012 - Ongoing Executive master in global supply chain management – EPFL, Switzerland
2006 - LICENCE LOGISTIC AND TRANSPORT MANAGEMENT, equivalence of the BACHELOR specialized in logistic and freight management
ISTELI INSTITUTE, AFT IFTIM group, Vilette d’anthon, FRANCE
2005 - BTS INTERNATIONAL TRADE, the French equivalence of the BETC Higher national diploma specialized in international trade.

PROFESSIONAL EXPERIENCE
August-December 2011: Network coordinator - Business development dept, CEVA, Marseille, France
October 2009-June 2011: Account coordinator - Oil and Gas dept, CEVA Freight management Houston, USA
July 2006-september 2009: Air export/import specialist - EAGLE/CEVA Freight management, Lyon, France

PROFESSIONAL OBJECTIVE
My main goal as a supply chain management professional is to deliver a surplus value to the job-
customer throughout optimal integration of supply chains and logistical processes, and top
engagement. I have a profesional background on the manufacturing sector for direct supply to
the automotive industry in Mexico in the áreas of procurement, customs and transportation;
posterior in distribution for the chemical industry, Mexico. It would be very challenging to head a
logistical team in which different, but complementary activities in the supply chain are performed.
