Postgraduate program

Theoretical part

The theoretical program consists of 19 modules of 40 hours each designed to enlarge the practical and methodological knowledge of the participants.

These subjects are tackled concretely by case studies explained by business professionals and are developed on a methodological point of view by professors from universities involved in the program.

<table>
<thead>
<tr>
<th>PROFESSIONAL KNOWLEDGE</th>
<th>METHODS AND THEORY</th>
</tr>
</thead>
<tbody>
<tr>
<td>P 1 – Logistical strategy</td>
<td>M 0 – General accounting</td>
</tr>
<tr>
<td>P 2 – Customer service</td>
<td>M 1 – Designing logistical systems</td>
</tr>
<tr>
<td>P 3 – Logistics and transportation systems</td>
<td>M 2 – Logistics and forecast analysis</td>
</tr>
<tr>
<td>P 4 – Logistics of International trade</td>
<td>M 3 – Designing the supply chain management</td>
</tr>
<tr>
<td>P 5 – Industrial production systems</td>
<td>M 4 – Managing human resources in logistics</td>
</tr>
<tr>
<td>P 6 – Information systems</td>
<td>M 5 – Logistics: processing and controlling</td>
</tr>
<tr>
<td>P 7 – Marketing and purchasing management</td>
<td>M 6 – Operations research in logistics</td>
</tr>
<tr>
<td>P 8 – Logistics and financial strategy</td>
<td>M 7 – Modelling and simulation in logistics</td>
</tr>
<tr>
<td>P 9 – Information technology for logistics</td>
<td>M 8 – Auditing the logistics performances</td>
</tr>
<tr>
<td></td>
<td>M 9 – Total quality management and logistics</td>
</tr>
</tbody>
</table>

Practical part

Once the theoretical part is successfully accomplished, students must realize a practical project within a company.

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project is operational and strategically oriented.

Academic staff supervises the practical project. It is completed within a company or at one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.

General calendar

> Theoretical part January - May
> Practical project June - December
## IML internship : general conditions

<table>
<thead>
<tr>
<th><strong>Internship period</strong></th>
<th>June to December 2004</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Length of the internship</strong></td>
<td>Minimum 20 weeks</td>
</tr>
<tr>
<td><strong>Student status</strong></td>
<td>“Etudiant-stagiaire”, student working permission for the foreign students</td>
</tr>
<tr>
<td><strong>Proposal of subject</strong></td>
<td>To discuss directly with the students or to contact IML</td>
</tr>
<tr>
<td><strong>Type of subject</strong></td>
<td>Strategic / operational projects important for the company in the logistics and management area</td>
</tr>
<tr>
<td><strong>Coordination</strong></td>
<td>Supervision from the company as well as IML; intermediate reports and meetings according to an initial planning done by the student</td>
</tr>
<tr>
<td><strong>Place of work</strong></td>
<td>Preferable in the company; IML offices and EPFL infrastructure are available for the students</td>
</tr>
<tr>
<td><strong>Presentation of the work</strong></td>
<td>December 2004, in front of a jury, represented by IML and the company</td>
</tr>
<tr>
<td><strong>Confidentiality</strong></td>
<td>On request from the company confidentiality is strictly respected</td>
</tr>
<tr>
<td><strong>Proposition procedure</strong></td>
<td>IML acts as intermediary between companies and the students while the students are also searching for internship themselves</td>
</tr>
</tbody>
