Postgraduate program

**Theoretical part**

The theoretical program consists of 19 modules of 40 hours each designed to enlarge the practical and methodological knowledge of the participants.

These subjects are tackled concretely by case studies explained by business professionals and are developed on a methodological point of view by professors from universities involved in the program.

<table>
<thead>
<tr>

<td>P 7 – Marketing and purchasing management</td>
</tr>
<tr>
<td>M 7 – Modelling and simulation in logistics</td>
<td>P 8 – Logistics and financial strategy</td>
</tr>
<tr>
<td>M 8 – Auditing the logistics performances</td>
<td>P 9 – Information technology for logistics</td>
</tr>
<tr>
<td>M 9 – Total quality management and logistics</td>
<td></td>
</tr>
</tbody>
</table>

**Practical part**

Once the theoretical part is successfully accomplished, students must realize a practical project within a company.

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and it is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project is operational and strategically oriented.

Academic staff supervises the practical project. It is completed within a company or at one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.

**General calendar**

> Theoretical part January - May
> Practical project June - December
### IML internship: general conditions

>> Professional objective
During my B.B.A. at HEC Montréal, I found a long time interest in International Management and Trade. At a professional level, most of my engagements forced me to understand client’s constraints in light of changing industry parameters. Today, Supply Chain Management offers concrete solutions to the globalization of markets most companies have to deal with. My aim is to develop leadership in global teams and operations and to participate into large projects in emerging markets of the developing world, exposing myself to local culture and society.
