GLOBAL SUPPLY CHAIN MANAGEMENT

LAUSANNE 09

CV BOOK

http://iml.epfl.ch

«CREATING SUPPLY CHAIN EXCELLENCE»
Executive Master in Global Supply Chain Management

Organized in collaboration with the EPFL, the ENPC, the AFT-IFTIM group and the Université Laval the program consists of 6 month theoretical part (academic program) followed by a practical project of 6 month (internship) which is to be carried out in a company.

General calendar

<tr>
<td>Practical project</td>
<td>July - December</td>
</tr>
</tbody>
</table>

Theoretical part

The academic program consists of 5 blocks with forty-hour courses each, designed to expand the practical and methodological knowledge of the participants.

Each block has 4 modules that cover the latest developments in theory, tools and best practices in supply chain management. Every module has a formal evaluation and a qualifying exam synthesizes the material for all of the courses in the module. At the end of each block are foreseen international team business games aiming to integrate the concepts covered in class. These business games are Web-based simulations in which players within a team use the Internet to collaborate, to reach decisions, to implement these decisions and to examine the results obtained. Some of the games are designed to develop a better understanding of fundamental supply chain concepts such as the Bullwhip effect and Risk pooling, but others are competitive games involving multi-enterprise strategic and tactical business decisions.

The teaching is ensured by both academics and business experts and is developed based on the methodology provided by the professors from universities involved in the program.

Practical part

Once the theoretical part is successfully accomplished, students must realize a practical project within a company (internship).

This project should be completed successfully over a minimum of 20 weeks. It gives students additional work experience and it is also a requirement to obtain the diploma.

The goal of the project is to realize a practical study or research showing high scientific capabilities, engineering knowledge and managing skills. The project could be operational or strategically oriented.

Academic staff supervises the practical project. It is completed within a company or in one of the research units of the organizing schools.

The report containing the results of the work must be presented in front of a jury.

# IML internship: general conditions

<table>
<thead>
<tr>
<th>Internship period :</th>
<th>From July to December 2009</th>
</tr>
</thead>
<tbody>
<tr>
<td>Length of the internship :</td>
<td>Minimum 20 weeks</td>
</tr>
<tr>
<td>Student status :</td>
<td>“Etudiant-stagiaire”, working permission for the foreign students</td>
</tr>
<tr>
<td>Proposal of subject :</td>
<td>Reflect companies needs; Could be defined by the company and discussed directly with the chosen student or defined with the help of IML staff</td>
</tr>
<tr>
<td>Type of subject :</td>
<td>Strategic / operational projects relevant for the company, which related to the supply chain management</td>
</tr>
<tr>
<td>Coordination :</td>
<td>Supervision from the company as well as IML; intermediate reports and meetings according to an initial planning elaborated by the student</td>
</tr>
<tr>
<td>Place of work:</td>
<td>Ideally in the company; During the internship students may benefit from EPFL / IML infrastructure</td>
</tr>
<tr>
<td>Presentation of the work :</td>
<td>December 2008, in front of a jury composed by IML coordinating staff and the company representative</td>
</tr>
<tr>
<td>Confidentiality :</td>
<td>If requested by the company confidentiality is strictly respected</td>
</tr>
<tr>
<td>Proposition procedure :</td>
<td>IML acts as intermediary between companies and the students; meanwhile the students are searching for internships on their own; Approaches for internship proposals:</td>
</tr>
</tbody>
</table>

1. The company formalizes the project and provides us with a written proposal explaining project mission, candidates requirements, deadlines, contact information; the offer will be announced to the students, the students postulate and interviews are scheduled with the company representative |

2. The company consults the 2009 CV book, chooses the candidates whose profile suit the best to their requirements and contacts them directly; In parallel the company will inform us about this approach |

3. The company will contact IML in order to define the project |

For further information or for sending internship proposals please kindly contact:

Professional objective
Work as a Supply Chain specialist to develop and implement optimal solutions preferably in an international environment. I have worked mainly in a manufacturing environment as part of Supply Planning departments. Thus, I would like to develop new skills in any area of Supply Chain but I have high interest in fields such as Forecasting and Demand Planning, Inventory Management, Purchasing and Sourcing or Business Model and Strategy.

Education
2009 – now Executive Master in Global Supply Chain Management, École Polytechnique Fédérale de Lausanne (Switzerland)
2001 – 2004 Bachelor degree in Business Administration, HEC Montreal (Canada) Including an exchange semester in Helsinki School of Economics – Mikkeli Business Campus (Finland)

>> Professional objective
During my B.B.A. at HEC Montreal, I found a long time interest in International Management and Trade. At a professional level, most of my engagements forced me to understand client’s constraints in light of changing industry parameters. Today, Supply Chain Management offers concrete solutions to the globalization of markets most companies have to deal with. My aim is to develop leadership in global teams and operations and to participate into large projects in emerging markets of the developing world, exposing myself to local culture and society.

>> Education
Bachelor of Business Administration (B.B.A), HEC Montréal, Canada
Specialization: Information Technologies in Organizations, International Management and Trade, Organizational Behaviour.

>> Professional objective
After my experience in purchasing in shipbuilding, my short term target is to apply my recent learnings to the demand side of the supply chain. My further career step would be to join a cross-functional department with a complete vision of an integrated supply chain, enforcing trade-off between supply and demand to reach common targets of cost, quality and leadtime. I have long term interest for a management position.
